

Iren has activated procedures to ensure business continuity

Reggio Emilia, 7 May 2024 - Iren learned this morning from the press of the application of an order of precautionary measures against the CEO Paolo Signorini ordered by the Judicial Authority of Genoa.

The contested crimes, reported in the press release of the Genoa Public Prosecutor's Office, refer to his previous role as President of the Western Ligurian Sea Port System Authority and therefore do not concern Iren.

The Group has already activated the necessary procedures to immediately guarantee full business continuity, and to this end, an extraordinary board meeting has been called by early afternoon today for the temporary assignment of powers.
