

## **IREN Ambiente wins the project financing concession for the construction and management of the Scarpino TMB**

*Reggio Emilia, 19 December 2019* – Iren Ambiente, 100% controlled by Iren Group, wins the public procedure announced by Amiu Genoa for the awarding of the concession, in project financing scheme, for the construction and management of a mechanical – biological treatment plant of the residual urban waste, with CSS production, to be carried out in Scarpino (Genoa).

The Liguria Region's Waste Management Plan envisages the plant, which will have a treatment capacity of 100.000 tons per year, and is a fundamental step related to the closing of the waste cycle in the Metropolitan city of Genoa and in the Liguria Region.

The investment amounts to 42 million euros and, at the end of the construction phase, Iren Ambiente will manage the plant for a period of 25 years.

Massimiliano Bianco, CEO of Iren Group declared: *"We are satisfied of the collaboration path started with Amiu that will allow us exploiting the competences and synergies of Iren's plants network serving the Liguria territory. In this way, Iren continues on its path, already outlined in the Business Plan, to complete the portfolio of services in its reference territories, contributing to the implementation of Liguria's plants system to achieve the self-sufficiency in the treatment, valorization and disposal of urban waste"*.
