

Eligible Green Category	Eligible Category	Details of KPI sminimun level	KPI	UM
Energy efficiency	Cogeneration Plant	Cogeneration facilities harvesting waste energy from heat or gas sources for the generation of electrical energy.	PES Primary Energy Saving Indicator per operating year [%]	%
			Renewable energy share in percent on total	%
			Thermal energy recovered from waste to DH network in MWh per operating year	MWh
			Net produced electricity from renewable non-fossil sources per operating year (kWh)	kWh
			Avoided CO2 emissions from fossil sources per operating year (t)	t
	Energy distribution & management	Projects and assets critical to the distribution and transmission of electrical energy for renewable sources or the transmission of captured heat.	Primary energy saving per operating year [MWh]	MWh
			Avoided CO ₂ emissions from fossil sources per operating year [t]	t
			Electrical energy produced from renewable non-fossil sources per operating year [MWhe]	MWh
			Thermal energy produced from renewable non-fossil sources per operating year [MWh]	MWh
			Distributed thermal energy per operating year [MWh]	MWh
Waste Management Efficiency & Recycling	Waste Management Efficiency & Recycling	Projects to increase sorted waste by 10% or more and decrease unsorted waste by 10% or more of gross waste handled.	Total sorted waste collection (t)	t
			Total of non sorted waste disposed (t)	t
			Number of bins for sorted waste	N
			Volumes of bins for sorted waste (m ³)	mc
			Door to door collection system (n)	N
			Sorted waste collection hubs (n)	N
			Volumes of waste collected in the collection hubs (t)	t
Renewable energy	Energy Network Development	Projects and assets critical to the distribution and transmission of electrical energy for renewable sources or the transmission of captured heat.	Primary energy saving per operating year [MWh]	MWh
			Avoided CO2 emissions from fossil sources per operating year [t]	t
			Distributed thermal energy per operating year [MWh]	MWh
	Mini Hydro	Projects and assets associated with the generation of electrical energy though hydropower projects with under 10MW capacity.	Electrical energy produced from renewable non-fossil sources per operating year [MWhe]	MWh
			Avoided CO2 emissions from fossil sources per operating year [t]	t
			Net produced electricity from renewable non-fossil sources per operating year (kWh)	kWh
			Net produced electricity from renewable non-fossil sources per operating year (kWh)	kWh
Solar	Projects and assets associated with the generation of electrical energy through Solar PV equipment.	Avoided CO2 emissions from fossil sources per operating year (t)	t	
Waste Water Treatment	Waste Water Treatment upgrades	Capacity improvements to wastewater treatment facilities to handle loads 30% higher than baseline performance.	Treated population equivalent (potential) (n)	N
			Analytic parameters (Abb % BOD, Abb % COD, Abb % SST, Abb % Ntot, Abb % Ptot)	%
			Volumes of water destined to irrigation re-usage / Volumes of total treated water	%
	Waste Water Plant Upgrades	Capacity improvements to wastewater treatment facilities to handle loads 30% higher than baseline performance.	Treated population equivalent (potential) (n)	N
			Analytic parameters (Abb % BOD, Abb % COD, Abb % SST, Abb % Ntot, Abb % Ptot)	%
