

## PIACENZA DISTRICT HEATING NETWORK, CONNECTION AND PUMPING STATION AT WTE

### CATEGORY

Renewable energy (Energy Network Development)

### LOCATION

### DESCRIPTION

The project consists of laying the pipes of the heat distribution network and creating heat exchange stations for users to increase the volume connected to the district heating service in the city of Piacenza.

The project also provides for the connection of the town district heating network with the waste-to-energy plant in order to use the heat produced by the combustion of waste and simultaneously allow the increase in volume connected to the district heating of about 1,000,000 m<sup>3</sup>.

Finally, the project involves the construction of the pumping station of the district heating network at the waste-to-energy plant.
