Project description

The aim of this project is to increase the waste treatment capacity of IREN AMBIENTE.

In particular, with this project, IAM will select waste as plastics, card and cardboard with a completely automated plant.

The referring area is Emilia Romagna region in particular the waste collected in the Province of Piacenza, Parma and Reggio Emilia.

In this way IREN AMBIENTE will growth the quality of the material sent to the “consorzio di filiera” as COMIECO and COREPLA.

To follow the changing of the market, the plant projected will assure the possibility to modify easily the selection of the material. Is possible to reach this achievement with an highly automatic selection plant.

The start of the works took place in 2020 and the plant will be finished in 2022
