Net profit		99	89	-10.6	-10.7%

Ebitda Bridge

- **Revenues down by 14.3%:** extraordinary climate conditions and persistent economic slowdown already reported.
- **Ebitda:** Increase in profitability thanks to positive performances in regulated sectors and sale of the residual Real Estate funds quota (which together offset a fall in unregulated activities). Relevant impact of synergies/cost-cutting.
- **Ebit +3.0%:** Provisions release offsetting higher D&A.
- **Net profit -10.7%:** Strong improvement compared to 1H 2014, reflecting better operating performances and lower taxes.

GENERATION AND DH – 3Q 2014 performance in line with 3Q 2013.

- **Cogen/Thermoelectric production sector: a 20% drop both in volumes (mainly climate effect) and electricity price** partially offset by positive **non-recurrent items** and sales to end clients.
- **Hydroelectric sector: +10% volumes** thanks mainly to the contribution of Tusciano hydroelectric plant. Basin levels in line compared to 30th September 2013.
- **District heating sector: the extraordinary mild temperatures** reported in 1H 2014 (plus GCs partial expiry and new CCI regulatory framework) affected the sector's production and margins.

ELECTRICITY PRODUCTION (GWh)

HEAT PRODUCTION (GWht)

MARKET – Stable results compared to 1H 2014.

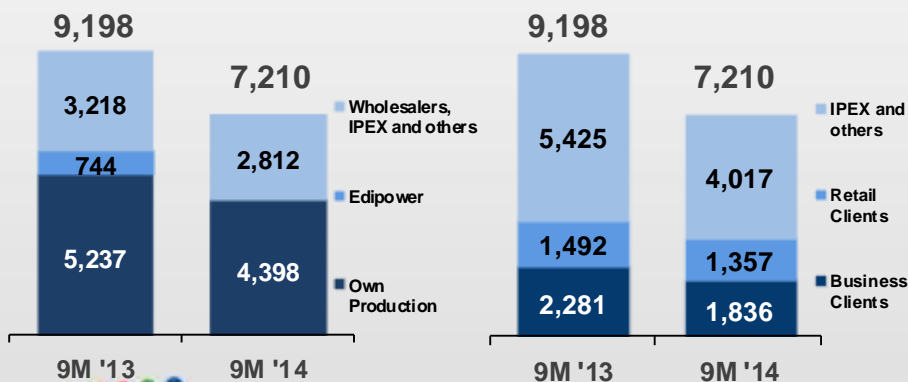

- **Gas Sales** affected by the new reg. framework (CCI) and by the extreme mild winter season (-15% volumes sold to end clients)
- **Electricity sales:** benefitted from the expiry of Edipower tolling agreement.

DISTRIBUTION – Efficiency and extraordinary items.

ENERGY INFRASTRUCTURE

- **Electricity networks: lower margin linked to the absence of 2013 positive extraordinary items and fewer services to end clients already reported in the 1H 2014.**
- **Gas networks:** Positive results linked to reduction in expenses and the economic recognition of the efforts in achieving compulsory energy efficiency targets.

	m€	9M '13	9M '14	Δ	Δ%
Revenues		238	241	3	1%
Ebitda		115	107	-8	-7%

<i>Gas distr. (mcm)</i>		939	730		

WATER

- **The favorable trend in Revenues and Ebitda continues thanks mainly to:**
 - Tariff growth (in compliance with the new Tariff Method) and 2012-2013 balance.
 - The absence of negative non-recurrent item reported in 2013 (“Water referendum”).
 - The granting of higher volumes of energy efficiency certificates thanks to the implementation of energy efficiency projects.

	m€	9M '13	9M '14	Δ	Δ%

Gross Capex		45	48	3	7%
<i>Volume sold (mcm)</i>		113	108		

WASTE – Steady growth in the sector.

- **Higher revenues and EBITDA linked to an improvement in all the sub-sectors** (higher electricity and heat production volumes, rationalization in tariff for waste collection and disposal, strong increase in special waste collection +25%, and cost savings).
- Sorted waste percentage higher than 63% (up from 61% reported in 9M 2013).

Group net profit	99.4	88.8	-10.7%	

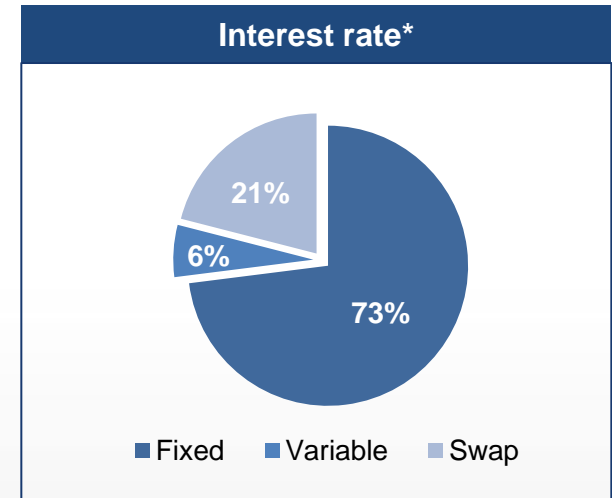

Cash-flow and NFP Bridge.

- More than 60% of the growth in NFP (approximately +60m€), is linked to non-operating capex, including the cash-out for the acquisition of further stake in TRM and Tecnoborgo S.p.A., (companies managing respectively Turin and Piacenza's WTEs)

Interest rate and debt structure.

- 6% of net debt at variable interest rate.
- Average long-term debt duration of about 5.1 years.
- Slight reduction in cost of debt (3.8% compared to 3.9 in 1H 2014 and FY 2013)
- Strong increase in percentage of IREN's Debt funded through bonds: 23% compared to 13% reported in 1H 2014 thanks to the 300m€ bond issue in July.
